

CF-616 氣動海棉模杯定型機
Pneumatic Sponge Cup Moulding Machinery

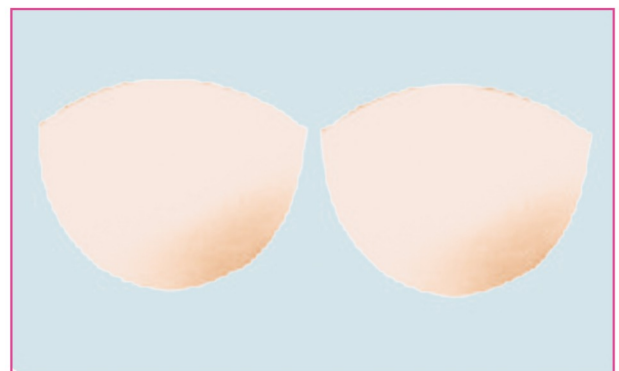

特點 FEATURES

該機是在吸收國外先進機型的基礎上，加以改進完善，採用進口零部件，內置式電熱管裝置，保温材料隔熱（減少電力的損耗）運用進口控溫表控制精度高，整機具有發熱均勻，定型效果成型一致，克服了傳統老式機型的機械結構鬆散，不精密，溫差大，造成模碗定型不穩定等缺陷。

本機可以同時安裝兩套模具，定型兩件模碗，也可以單機使用，操控簡便，是廣大文胸廠家模杯生產的理想設備。

Improved type on the basis of imported machinery, imported spare parts used. In-built electrothermal tubes to isolate heat (to reduce power consumption). imported thermal meters to control temperature.

Optimum shaping results. 2 moulding can be used simultaneously for moulding 2 sponge cups. Single moulding type also available convenient operation. ideal for all bras manufacturers.

型號	長 (模臺尺寸)	寬 (模臺尺寸)	發熱功率	長	寬	高
Model	Depth	Width	Heat power	Depth	Width	Height
CF-616	400mm	210mm	6400W	1250mm	700mm	1850mm
