E-mail : chengfeng-gd@163.com

## 技術特點 FEATURES

- 用於粘合恤衫袖山縫，回轉式結構設計，有效提高工作效率；
- 採用可編程序控制器（PLC）集中控制，抗幹擾性強，穩定可靠；
- 採用觸摸屏實現了人機對話，使機器的操作、維護及保養方便簡單；
- 可準確地調校壓力及溫度，配合不同布種需要；
- 粘合採用輕壓、脈沖壓、重壓三種方式組合，壓燙效果更加出眾；
- 備有三個獨立數控電子溫控表，控制溫度更精準；
- 配有配合高科技合成特料研制的氣袋，防止粘合膠滲漏上布；
- 配有強勁吸濕泵，提供穩定定位功能；
- 雙手啟動設計，確保使用安全

- It is used for binding the sleeve cap of shirt, and can effective improve the working efficiency due to its rotary structure;
- It is controlled with programmable logic controller (PLC) and features high anti-interference performance, stable and reliable running;
- It achieves human-machine dialogue with touch screen, and the operation and maintenance of the machine is convenient and simple;
- The pressure and temperature can be accurately adjusted to meet the demands of different clothes;
- The binding adopts three combined modes: light press, pulse press and heavy pressure to achieve better pressing effect;
- It is equipped with three independent numerical control electronic temperature control meters, which can accurately control the temperature;
- Combining the air bag made of hi-tech compound material, it can protect the cloth from adhesive;
- It provides the stable positioning function with the powerful moisture absorption pump;
- The machine is started with both hands to ensure safe use

## 技術規格 Technicalspecification

電源電壓 Supply Voltage	220V/50HZ
壓力 Pressure	5kgf/cm <sup>2</sup>
壓縮空氣壓力 Pressure of Compressed Air	0.6Mpa
功率 Power	3Kw
最高溫度 Highest Temperature	200°C
淨重 Net Weight	520KG
機身尺寸 Dimension	165*155*195cm
